Directions: Please go through the steps below to claim your CSE account, add a picture of yourself on your Vista Profile, and to explore the WingWare IDE 101 environment.

2. Add a picture of yourself to your eCampus Profile. This should be a clear photo that shows your face so the instructors and TAs can identify you.
   a) Log into eCampus ([http://ecampus.tamu.edu/](http://ecampus.tamu.edu/)).
   b) At the top of the page, you’ll see the tabs “eCampus,” “ePortfolios,” “Courses,” “Community,” and “Content Collection.” Click the “eCampus” tab.
   c) Under “Tools” on the left hand side of the screen, click the “Personal Information” link.
   d) Click on “Personalize My Settings” link.
   e) Click on “Browse My Computer” button and add your photo (Avatar image).
   f) Click the “Submit” button.

3. Let’s get familiar with the WingWare IDE 101 environment you will be using to write your Python programs.
   a) Start the WingWare IDE 101 environment.
   b) Explore the environment. Don’t worry that most things won’t have much meaning to you. I just want you poke your nose around to see what’s available.
   c) In the Python Shell, type a few of the examples from the class notes to explore interactive execution.
d) Now, change the user interface of your environment. Go to Edit -> Preferences and explore the various options for changing the user interface. If you mess up your environment and want to start over, you can always get back to the factory settings by going to Edit -> Preferences and hitting the Factory Defaults button at the bottom of the Preferences screen.

e) Once you have your interface suited to your satisfaction, take a screenshot.

f) Submit your screenshot to eCampus for this assignment.

4. Submitting your assignment.

a) To allow the TA to grade this lab with the grading form, you will need to go through the process of submitting through eCampus.

b) After you have your CSE department account and have loaded your picture into your eCampus profile, select Lab Assignment #1 and add as an attachment a screenshot of your WingWare IDE 101 environment. Do not add your Avatar picture as an attachment.

c) You only get one chance to submit your work. Once you are satisfied with your screenshot, submit your assignment.
