CSCE 110 — Programming I
Academic Misconduct

Dr. Tiffani L. Williams

Department of Computer Science and Engineering
Texas A&M University

October 18, 2011
An Aggie does not lie, cheat or steal, or tolerate those who do.

- As a member of the Aggie family, I take the above words seriously.
- Below are the penalties if you are caught cheating (e.g., plagiarizing code) from someone else in this course.
  - You will receive an F or F* in the course.
  - Also, the act will be reported to the Aggie Honor System Office.
- It’s very easy to detect plagiarism in a beginning programming class. So, do your own work.
- However, I do encourage you to discuss ideas with each other. But, make sure you write your own program!
You do not have to cheat to be successful.

- If you need help on your assignments, then seek help honestly. Do not perpetuate the problem by plagiarizing the work of others.
- Each of you is a unique, creative individual. Thus, the way you write your programs will be different.
- You are all capable of doing the work. Otherwise, you would not be here. Do not cheat yourself the opportunity to do your best.
As of today, all reported cases of cheating have been dismissed.

- I would like to keep it that way and focus on teaching and having fun with Python.
- And, you can focus on learning the material.
